Dear New Patient,

Welcome to Island Weight Clinic Physician Supervised Weight Control program!

We are happy to have you as our patient and we promise to do our very best to help you attain your ideal body weight. So, if you have any questions, concerns, or just unsure of something, please direct your questions to us.

While on any of our programs, we will supply you with the prescription and non-prescription medications your specific programs call for, but by law, we are required to give you the option to buy such medications from a pharmacy of your choosing. This, however, will not affect your program fees. Your program fees will remain the same.

If you choose to have us furnish your program medications, we would like your permission to dispense them in non-childproof, labeled and sealed packages and, by signing below, you are giving us permission and understand that you will transfer such medications into the childproof bottles that were given to you on your first visit.
